Art Unit: 2137

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-8, drawn to copy protecting video, classified in class 380, subclass 201.

II. Claims 9-33, drawn to video signal modification, classified in class 380, subclass 210.

III. Claims 34-48, drawn to encoding to reduce bandwidth used in transmission, classified in class 375, subclass 240.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as modifying the signal without the pre-authoring program of invention I adding the copy protection.

See MPEP § 806.05(d).

3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has

separate utility such as transmitting the signal without the encoding of invention III. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would require different searches, restriction for examination purposes as indicated is proper.

Conclusion

A shortened statutory period for response to this action is set to expire one month (not less than 30 days) from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
